Treasurer
R. E. LATHROP
Waukesha, Wis.

Executive Committee
H. F. WAREING
Milwaukee, Wis.
G. SAYRE
Janesville, Wis.
PAUL KEHL
Green Bay, Wis.

Dear Bryant:

I have just finished reading the Bulletin, - sure is getting to be an interesting paper. The article by Daenstadt is a credit to the organization, a tough subject very well analyzed and written. Articles of that nature will be well received by police radio men and their continuance will do much to increase the influence of the organization. It is the first article I have read which gives a real intelligent and practical comparison of AM and FM.

Another article kind of griped me a little, it seems to me that it would not hurt any if we would get off the defense for a while and hop over to the offense. I do not recall of ever seeing much in the bulletin about our achievements in carrying out our primary function. From now until November we are going to hear plenty of ballyhoo, let's get into the swim, go modern and dish it out including a few adjectives ala Hearst. In this connection I offer the following for your consideration.

This coming Fall we will have a Conference accompanied by the proper publicity. Most likely a special bulletin will be published which will have a wide circulation. This bulletin should contain an article about our achievements in police work. We certainly should be able to locate enough specific cases to make up a good story. Many will read this and their opinion of APCO in the future will be based on what we have accomplished in the past.

A little squib in the bulletin asking for material to make up a story should bring a few responses. I am sure a letter directed to WCK will bear fruit. Yes, we will give some dope for an article, but to keep it National in character our "Milk" circuit could be omitted.

Think the above over for a while and let me know your reactions.
