

17

PRESIDENT BATTS:- All of the business that we had which was to be taken care of has been ~~done~~ ^{handled} at this time with the exception however, of a resolution which has been submitted to the Secretary by Lt. Cox of Berkely, California, but I do not see Lt. Cox in the room at this time, so we will have to let that ride for a while.

PRESIDENT BATTS:- I think it would be a good idea for each member present to stand up and introduce himself. The Chair will entertain a motion to that effect.

MR. FRANKLIN:- Mr. President, I move that each member present stand up and introduce himself.

MR. SCROGGIN:- I second that motion. Motion carried and all members were requested to stand up and introduce themselves.

PRESIDENT BATTS:- I notice Lt. Cox has come into the room. Lt. Cox, will you please read the proposed resolution that you handed to the Secretary and give a short talk on it?

LT. COX:- This resolution pertains to an increase in daytime power for municipal police stations to 1000 watts under certain conditions and reads as follows:-

RESOLUTION

"Proposing the Revision of the Rules and Regulations of the Federal Communications Commission to provide for the Employment of Daytime Power of 1000 watts by Municipal Police Stations, Under Certain Conditions.

WHEREAS: The maximum power of 500 watts for municipal police stations is, in certain areas of the United States insufficient to provide adequate coverage of the areas desired to serve, and;

WHEREAS: It appears that additional daytime power will materially aid in the solution of police communication problems of certain areas of the United States, and;

WHEREAS: It appears that increased daytime power of municipal police stations will not in any way be detrimental to the interests of the police communication systems of the United States,

NOW THEREFORE: Be it resolved that the APCO does hereby recommend to the Federal Communications Commission the revision of Rule 330-A to read in continuance as follows. In the event that the amount of power allocated above is insufficient to afford reliable coverage over the desired service area, the Commission may authorize the use of addi-
