found that my company was down for a talk. I havn't prepared anything and I really havn't very much to say. I have been an ardent supporter of this organization and I feel sure that it is due for great accomplishments.

PRESIDENT BATTS:- I have had almost a flood of wires and letters since the morning session and I am afraid that we had better begin to get some of them out of the way. Here is a letter from Mr. Allen of Florida and a wire from Mr. Frye which read as follows:-

~~Mr. Batts:-  
I did not have the letter or wire, will  
you please insert them.~~

There are also four wires from New York City all concerning an invitation to come to New York City for our 1937 convention. Here is also a very beautiful invitation for us to come to Cleveland and also a like invitation from Kansas City, Mo. However, I think we had better leave the reading of the four telegrams go until we come to that matter on our program.

PRESIDENT BATTS:- Next on our program will be the discussion of the Affiliation of APCO with State Communication Organizations. We have several members here who can be of great assistance on such a discussion and there are several members who are absent at the time who have been very active in the organization and could lend some valuable help on this thing. However, we will proceed with the Resolutions which have been prepared and studied by the Executive Committee. I wish to explain further on that. It is our opinion, and the opinion of several others, that we have now reached the point where we absolutely have to take care of these State organizations, I mean from the standpoint of direct affiliation with the National Organizations. With that in mind, we have drawn up a few resolutions which are self explanatory and which I will read:-

(Here insert Resolutions. I did not have them.)

(attached herewith)
