

MR. O'NEIL:-

Mr. O'Neil made a very interesting and convincing talk on the requirements and need for a definite order of transmitting fingerprint identification by radiotelegraph, or by any means.

Mr. O'Neil is Chairman of the Science and Practice Committee of the International Association for Identification and an "old-timer" in the radio game. He presented and discussed a printed message blank or form which had been approved by the F.B.I., the A.I.I., and many other Superintendants of Identification Bureaus. His blank had already been submitted to the Intercity Committee and discussed at length previous to the Convention.
